MI40 End Stop

MI40 Track Stop for MI40 Track. Two CNC machined 1/4" x 1" aluminum flat bars with contours that match the curvature of the MI40 Curtain Carrier, so as not to "ding" the carrier wheel. The rear bar is threaded for a 5/16" socket head screw to fasten the track stop to the track without needing a nut. The MI40 Track Punch will quickly and efficiently add a hole to mount the MI40 Track Stop.
