## The Light Source

## **Mega-Coupler Pipe Adapter**

The Pipe to Coupler Adapter can be used to rig pipe-mounted plasma screens, projectors and speakers from overhead pipe or truss. The Pipe to Coupler Adapter attaches a standard threaded NPT I-I/2" pipe (I.9" OD) to a Mega-Coupler. There are two interlocking tabs to keep the adapter from rotating. The Adapter is fastened to the Mega-Coupler with the I/2"-13 tpi by I-I/4" long bolt and Nylock nut that comes with the Mega-Coupler (not included). There is a I/4-20 set screw to lock the pipe rotation, and an inspection hole to verify that the pipe is fully inserted.

The Mega-Coupler Pipe Adapter can also be used on a Mega-Claw.

Working Load 1100 Pounds

Limit

Hardware  $1/4'' \times .375$  Socket Set Screw
